The Following Estimate is based upon a Physical Site Inspection on 7/3/2025, by Jared V. Boergadine.
Information was also gathered from an interview with owners and available information from web sites as needed.
Approved Architectural & Engineered drawings were not available at the time of inspection.
The purpose of this report is to establish a Scope of Work for use by the insured and/or the insured's representative company.
All items in this scope of work are based on the current conditions at the time of inspection.
Any hidden or unforeseen damages that may be uncovered during demolition and reconstruction are excluded from this estimate and will need to be added or supplemented.
Code upgrade requirements from the local building department are not included in this scope of work unless specified and may need to be added or supplemented.
This estimate may need to be revised as additional information becomes available.
Prices are considered current for approximately 1 month and will need to be reviewed and revised every month to be current.
Xactimate estimating software is a tool used as a guideline to produce pricing for this scope of work.
Components and prices may need to be adjusted to account for material availability and scarcity from wide spread disaster events, current market labor conditions, sub contractor pricing and local market supply and demand.
This scope of work is solely for the purposes of establishing work required to return the property to it's pre-loss condition, this is not a solicitation or bid to contract for construction work.
This estimate and report and all its contents are the sole property of Jared V. Boergadine.
Any alterations, changes, additions, or deletions to this estimate are strictly prohibited unless performed by Jared V. Boergadine.

Trim work painting - \$33,862.00

Exterior Prep Scope of Work — 16640 Via Pacifica, Pacific Palisades, CA
Exterior Wood Window & Door Restoration — 16640 Via Pacifica, Pacific Palisades, CA

Scope of Work:
Restore all exterior wood-framed windows and exterior doors impacted by smoke and ember exposure.

- 1. Surface Preparation
Sand and clean all wood windows, trim, and door casings to remove soot residue, contaminants, and degraded coating
Spot prime any bare or exposed wood using a premium exterior-grade primer
Detail sanding performed by hand or fine tools to maintain original profile integrity
 - 2. Finish Coating
Apply two full coats of high-performance exterior-grade paint or finish, brushed or sprayed based on accessibility and detail level
Use Sherwin-Williams Duration or equivalent premium product for superior protection and finish longevity
Match existing color and sheen unless otherwise directed by the client
 - 3. Final Detailing
Inspect for uniformity and perform any necessary touch-ups
Re-caulk or seal joints around trim as needed
Mask and protect all adjacent finishes, glazing, and hardware throughout the process
- Interior Repaint
\$137,460.00

INTERIOR SCOPE – 16640 VIA PACIFICA, PACIFIC PALISADES

Project Overview:
On-site inspection revealed residual smoke odor in multiple areas of the home, particularly in upper-level rooms and along ceiling lines. While the property has undergone partial cleaning, smoke damage remains evident in both scent and surface condition. Several rooms feature high-end wallpaper (not yet replaced). Walls that previously had wallpaper will need to be prepped appropriately for new installation. The home includes detailed architectural trim throughout, including crown molding, baseboards, door and window casings, and other decorative wood elements — all of which will be fully refinished as part of the restoration process.

Scope of Work – Interior

- 1. Wallpaper Prep
Full prep for wallpaper installation in designated rooms (as marked by homeowner and wallpaper installer)
Prepare wall surfaces to a smooth, uniform substrate suitable for high-end paper
Apply Roman Pro-977 Ultra Prime or equivalent wallpaper primer, selected based on the type of wallpaper (e.g., silk, vinyl, grasscloth)
- 2. Interior Trim & Millwork Repaint
Prime and repaint all paint-grade interior trim and millwork, including:
Crown molding, baseboards, door/window casings, ceiling trims, panel moldings
All trim to be thoroughly sanded and caulked as needed, then spray-finished using Sherwin-Williams Duration Interior Enamel for a smooth, factory-grade appearance
Color and sheen will match existing unless otherwise directed
- 3. Architectural Wood Elements Refinishing

Premium Quality Travertine stone floor tiles, with minimal pits/filler. Travertine is a very porous stone and as such is very susceptible to damages and staining from smoke and ash based contaminations. due to the level of soiling present in the home, a replacement is warranted on all porous stone surfaces. Due to the small cuts and vertical nature of this tile, grinding will be difficult without damaging these tiles so replacement is preferred

The angle stop valve was replaced rather than reused due to the risk of failure associated with aging or previously disturbed plumbing components. Reusing an old valve can result in leaks or malfunction, especially after being shut off and turned back on during repairs. Replacement ensures a reliable seal, compliance with plumbing best practices, and minimizes future water damage risk.									
143. PLM	CAPC		+ Water line copper cap/plug - per cap						
		3	3.00 EA		0.00+	29.74 =	0.47	17.94	107.63
Copper plumbing caps have been installed on exposed angle stops to properly terminate water supply lines after fixture removal. This prevents debris intrusion and potential water discharge, ensuring safety and compliance with industry standards during mitigation or repair phases. The caps also allow for future reconnection of fixtures without additional plumbing modifications.

	3	3.00 EA [*]			7.62+	431.90 =	121.13	287.94	1,727.63

The existing retractable screen door was damaged as a result of the loss event and is no longer functional. This unit is a Pella-branded retractable screen system designed for a standard 36" exterior door. Replacement requires a complete retractable screen assembly, including housing, track system, latch, and screen. Pricing is based on Pella's current market pricing for a 36" retractable screen door kit.

Total assumed material cost for replacement: \$425.00.

CAT	SEL	ACT DESCRIPTION		RESET	REMOVE	REPLACE	TAX	O&P	TOTAL
	CALC	QTY							
Replacement of approximately 24 linear feet of full-height family room cabinetry is required due to pervasive smoke and ash contamination resulting from a nearby fire event. While the cabinet surfaces may appear superficially intact, the cabinetry includes substantial voids, cavities, and dead air space behind and within each unit — including between the cabinet backs and wall framing, as well as inside upper cabinets and lower base structures.									
Smoke particulates and odor-causing compounds are known to penetrate these enclosed areas, especially through seams, toe kicks, and the rear of cabinet boxes. These areas are typically inaccessible for effective cleaning, and the absorptive materials (e.g., wood, adhesives, and backings) trap odors long-term, even when sealed finishes are present on the exposed surfaces.									
Due to the long-term risk of residual odor, off-gassing, and potential occupant health sensitivity, remediation is not a viable solution. Full removal and replacement of the cabinetry is necessary to restore the room to pre-loss condition and ensure no residual odor remains. This scope includes demolition, disposal, and installation of new cabinetry to match existing layout and finish.

	CALC	QTY							
The angle stop valve was replaced rather than reused due to the risk of failure associated with aging or previously disturbed plumbing components. Reusing an old valve can result in leaks or malfunction, especially after being shut off and turned back on during repairs. Replacement ensures a reliable seal, compliance with plumbing best practices, and minimizes future water damage risk.									
320. PLM	CAPC	+ Water line copper cap/plug - per cap							
		3	3.00 EA		0.00+	29.74 =	0.47	17.94	107.63
Copper plumbing caps have been installed on exposed angle stops to properly terminate water supply lines after fixture removal. This prevents debris intrusion and potential water discharge, ensuring safety and compliance with industry standards during mitigation or repair phases. The caps also allow for future reconnection of fixtures without additional plumbing modifications.
